

# GRIPPER KIT

Loading a t-shirt on the Brother® GT printers is really easy. But when it comes to printing on thicker items (i.e. sweatshirts and canvas bags) or printing on specific areas of a garment (i.e. long sleeve and short sleeve), getting the garment to stay as flat as possible can be more challenging. The Gripper Kit mounts to the bottom of all Brother® GT Adult, Youth and Oversized Platens; and securely holds the garment in place without the use of clips, rubberbands or tape.
